

# SPURTHI BILLA

Aspiring Software Developer & Data Science Engineer  
billaspurthi@gmail.com | +918897678553 | Mulugu, Telangana, India  
**Linkedin** | **GitHub** | **LeetCode** | **Portfolio**

## EDUCATION

### SR University

Computer Science Bachelor of Technology  
CGPA: 8.220

Warangal Telangana 506371

july 2023 - july 2027

## EXPERIENCE

### AICTE EduSkills (Supported by Zscaler) | Networking Virtual Intern March 2026

Remote | January 2026 -

- Completed a 10-week networking virtual internship supported by Zscaler.
- Learned networking fundamentals including TCP/IP, DNS, routing, and network security.
- Gained exposure to cloud security and SASE architecture concepts.
- Completed hands-on networking labs and security simulations.

## SKILLS

Programming Languages: Java, Python, SQL, Data Structures & Algorithms  
Libraries/Frameworks: Pandas, NumPy, React, JavaScript, Matplotlib, Scikit-learn, Node.js  
Tools / Platforms: Git, MySQL, VS Code, Jupyter Notebook, GitHub  
Databases: MySQL, MongoDB

## PROJECTS / OPEN-SOURCE

### AI Resume to Portfolio Generator | Link

*React.js, Node.js, Express.js, Tailwind CSS, Recharts*

Built a full-stack AI-powered web application that converts PDF/DOCX resumes into beautiful portfolio websites instantly.

Developed 5 unique responsive portfolio templates including Dark, Editorial, Bento, Terminal, and Minimal Swiss grid styles.

Implemented an ATS resume scoring system with section-wise grading for Contact, Skills, Experience, and Projects along with improvement suggestions.

Added ZIP export functionality allowing users to download and host their generated portfolio anywhere for free.

Deployed frontend on GitHub Pages and backend on Render for full production accessibility.

Focused on modern UI/UX, responsive design, AI integration, and real-world portfolio generation workflow.

### ReTurn Smart Micro-Task Matching Platform | Link API

*HTML, CSS, JavaScript, Firebase, Geolocation*

Developed a real-time platform to assign nearby tasks to delivery riders during return trips

Implemented location tracking and smart task matching using Firebase and Geolocation API

Built a responsive dashboard with task management and earnings analytics

Integrated secure authentication and admin monitoring system

### HarvestHub AI AI-Powered Agriculture Marketplace | Link JavaScript, Firestore, GitHub Actions, Machine Learning

*React, Firebase, Tailwind CSS,*

Built an AI-powered agriculture marketplace connecting farmers and buyers with role-based dashboards.

Enabled real-time data sync using Firebase Firestore and ML-based crop price prediction.

Implemented CI/CD with GitHub Actions and designed a responsive UI using Tailwind CSS.

### Student Performance Prediction using Machine Learning | Link Matplotlib

*Python, Pandas, Scikit-learn,*

Built a machine learning model to predict student performance based on study patterns

Performed data preprocessing, feature engineering, and model evaluation

Visualized insights using Matplotlib to analyze trends between study hours and scores  
Improved prediction accuracy through structured data analysis

### **Fake News Detection using NLP | [Link](#)**

*Python, Scikit-learn, Pandas, TF-IDF, Streamlit*

Developed an NLP-based model to classify news as fake or real using TF-IDF and Logistic Regression

Built an interactive Streamlit web application for real-time predictions

Applied preprocessing techniques including tokenization, stopwords removal, and vectorization

Evaluated model performance to ensure reliable predictions

### CERTIFICATIONS

---

- Software Engineer Intern - **HackerRank**
- Frontend Developer (React) - **HackerRank**
- GenAI Powered Data Analytics - **Forage**
- Cybersecurity Analyst - **Forage**
- Networking Virtual Internship - **AICTE EDUSKILLS**
- Java(Basic) - **HackerRank**
- SQL (basic) - **HackerRank**
